

Earn 5 CE credits for reading volumes of the *Advances in Psychotherapy* book series

“Clinical and counseling psychologists appreciate the importance of ensuring that the treatments they provide are grounded in empirical research, but they often have trouble keeping up with the latest research findings. *Advances in Psychotherapy – Evidence-Based Practice* is a book series developed by The Society of Clinical Psychology (APA Division 12) to address this problem. The Society is delighted to be working with the National Register and Hogrefe to make books in the series available to Division 12 and National Register members at a substantial discount along with the potential for earning continuing education credits. Reading these books will inform your practice and expand your skills.”

How does it work?

Psychologists and other healthcare providers may earn five continuing education credits for reading the books in the *Advances in Psychotherapy* series and taking a multiple choice exam. This continuing education program is a partnership of Hogrefe Publishing and the National Register of Health Service Psychologists.

The National Register of Health Service Psychologists is approved by the American Psychological Association to sponsor continuing education for psychologists. The National Register maintains responsibility for this program and its content.

Readers who are not members of National Register can purchase each exam for US \$25.00 or access to the entire series of exams for US \$200.00. National Register members can take the exams free of charge.

Exams are available for 30 topics / books, with new titles being continually added.

Advances in Psychotherapy

Evidence-Based Practice

Book series developed and edited with the support of the Society of Clinical Psychology (APA Division 12)

The series provides practical evidence-based guidance on the diagnosis and treatment of the most common disorders seen in clinical practice – and does so in a uniquely reader-friendly manner. A new strand is dealing with methods and approaches rather than specific disorders. Each book is both a compact how-to reference for use by professional clinicians in their daily work, as well as an ideal educational resource for students and for practice-oriented continuing education.

43 volumes plus 4 new editions have been published to date. The first volume in a new strand dealing with methods and approaches started with the release of *Mindfulness*.

- **Practice-oriented:** The main emphasis is on information that therapists and practitioners can use in their daily practice.
- **Easy-to-read:** The most important information is summarized in tables, illustrations, or displayed boxes, and marginal notes.
- **Compact:** Each volume consists of 80-100 pages.
- **Expert authors:** We recruit genuine authorities to write for the series; many of our authors are leaders in the Society of Clinical Psychology (APA Div. 12).
- **Regular publication:** We aim to publish 4 volumes each year.
- **Reasonably priced:** The list price is under \$30 per volume. Discounts are available.
